**1. Restriction to one of the following inventions is required under 35**

**U.S.C. 121:**

**I. Claims 1-12 and 21-23 drawn to a method of controlling an extrusion process, classified in class 264, subclass 40.1.**

**II. Claims 13-20 and 24-29, drawn to an apparatus for controlling classified in class 425, subclass 135.**

**The inventions are distinct, each from the other because of the following reasons:**

**2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the extrusion apparatus and the control for the apparatus can be used in mixing and need not be used in shaping an article and therefore the method of controlling the apparatus for extrusion shaping would be different than for controlling a mixing apparatus.**

**3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.**

**4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.**

**5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Lechert Jr. whose telephone number is 571-272-1203. The examiner can normally be reached on 9:30-6:00.**
